

NATIONAL GEOSPATIAL-INTELLIGENCE AGENCY

20 April 2006

To Our Colleagues:

1. On behalf of all our personnel, I cordially invite you to the GEOINT Sciences Symposium and Forum, 27-28 June 2006 in St. Louis. The Office of GEOINT Sciences has the responsibility for providing geodetic and geophysical support to NGA, DoD, and the Intelligence Community (IC). This invitation is extended to all our customers, potential customers, NGA, and DOD/IC.
2. The Symposium and Forum provides us an excellent opportunity to learn and discuss about the direction of the programs within The Office of GEOINT Sciences. It also allows our guests the opportunity to inform us on their current requirements and future needs. Highlights of the symposium include our guest speaker at lunch, Mr. Scott White, Director, Source Operations & Management Directorate, and a discussion panel on "The Future of Precision Navigation & Positioning".
3. I encourage you to browse this website about pertinent GEOINT Sciences Symposium and Forum information. The first day of the Symposium and Forum will be held at The Hilton Hotel and the presentations/discussions must be kept at an UNCLASSIFIED//FOUO level. The second day, breakout sessions will be held at the NGA-St. Louis site, to provide the appropriate environment for classified level discussions.
4. We are excited about hosting the GEOINT Sciences Symposium and Forum. We are looking forward to seeing you in St Louis.

Sincerely,

THOMAS M. SHEA
Colonel, USA (Ret.)
Director, Office of Geospatial
Intelligence Sciences
Source Assessment and
